

Tentative Agenda

Jones Falls Habitat Protection And Restoration Workgroup Meeting

January 14, 2015

Introductions and Background

Each attendee

Jones Falls watershed

Current Status

Healthy natural trout stream

Large stable spring based flow from Cockeysville marble

Public sewer and water prohibited by zoning

Large estate owners

Has some thermal stresses from lack of shade and summer stormwater runoff

Threats

Development at margins of watershed threatens water quality and temperature regime

Possible protection strategies

Reestablish relationships with landowners

Collaborate with Valleys Planning Council

Coordinate with Baltimore County agencies – planning and zoning, Dept of Environmental Protection and Recreation and Parks

Form partnerships with TU, VPC, IWL others?

Restoration Needs

Next Steps
